

BLACK LIST **AS OF JANUARY 2022**

Pursuant to Article 13g paragraph 2(3) Austrian Waste Management Act 2002, the obligation to participate in a packaging collection and recovery scheme does not apply to packaging that is contaminated with hazardous waste or with adhesive residues in such a way that they prevent or disproportionately complicate re-use or recycling of the packaging.

- 1) Packaging of products that must be labelled with the following symbols (they are considered hazardous waste even when emptied completely):

- 2) Packaging with radioactive substances in accordance with the Radiation Protection Act, Federal Law Gazette No. 50/2000
- 3) Packaging with infectious substances in accordance with HP 9 (Annex 3 of the Waste Catalogue Ordinance, Federal Law Gazette II No. 409/2020).

This applies only to sales packaging or primary packaging that is in direct contact with the substances or products listed above.

Please do not hesitate to contact us should you have any further questions.
